

# TARA LABS

## RSC Prime AC

The RSC® Prime AC uses proprietary Rectangular Solid Core® conductors; the lower noise floor reveals subtle ambient detail in music and soundtracks; delivers crystal-clear picture with vivid color.

- \* Wattgate standard IEC plug. Shielded
  - \* 14 gauge conductor runs.
  - \* SA-OF8N® copper.
- \* Helixed pair of RSC® Gen 1 conductors
- \* Each pair of conductors is separately shielded and physically isolated to reduce noise between live neutral and ground paths.
- \* Anti-Corrosion coated SA-OF8N® copper conductor

## REVIEWS:

"I have been on a quest for over a year, replacing a 20+ year old system, and the cables were the last piece of the puzzle. I've been through cables from MIT Matrix 23 and Alpha Core Goertz Vericity M12 to van den Hul D-352 and have been disappointed by each of them in one aspect or another. Tried against even Shunyata Black Mamba's at 3X the price, the TARA Labs held their ground...amazing!" - John R., USA

"It may look like a stock OEM power cord, but its performance is superb. Both fluid and immersive, it delivers a big, dense sound in both timbre and bass definition. There's a good amount of midrange warmth, and it's largely free of upper-frequency peakness, to boot..." - Neil Gador / The Absolute Sound

"I really appreciate the TARA Labs Prime AC cables. I read the review in TAS, bought it, and cannot be happier that I did. I now have five Prime AC cables in my system." - Jess
