

# TARA LABS

## The 2 Speaker Cable

The 2 speaker cables use SA-OF8N copper conductors. (Super-Annealed, Oxygen-Free, Mono-Crystal, Frequency-Tuned, 8-Nines-99.999999% copper conductors) All cables have: hand-polished conductors and are handmade per order in Ashland, Oregon, USA.

- \* BSM (with 1/4" Spades or Bananas)
- \* 8+ gauge conductor runs
- \* Shielded
- \* SA-OF8N® copper.
- \* Each channel comprised of 64 RSC® Gen 2 conductors in Aero-PE® dielectric.
- \* Positive/negative run for each channel separated into LF & HF conductor paths
  - \* Positive/negative runs are 32 conductors each
  - \* Extremely neutral & open
  - \* Spacious soundstage
  - \* Powerful & articulate

### REVIEWS:

"I wanted to let you know that last weekend I finally had the chance to incorporate all your cables in my Kondo/Tidal set up. In one word: I am very impressed! A deep black background, a large space in which the various instruments can be recognized and followed (tunes fading away) very clearly. The combination of tremendous transparency and beautiful tonality makes them addictive." - Rodolf
